Investment Objective

To provide income enhancement and preservation of capital by investing in prime quality Financial Sector TFCs/Sukuku, Bank deposits and short-term money market instruments.

Fund Manager Commentary

The Fund generated an annualized return of 8.7% for the month of January 2014 versus the benchmark return of 9.2%. Since its launch in October 2011, the Fund offered an annualized return of 9.9% against the benchmark return of 9.5%, hence an outperformance of 0.4% p.a. This outperformance is net of management fee and all other expenses.

The Fund is unique as it invests a minimum 70% of its assets in Financial Sector (mainly banks) debt securities, instruments or deposits. Minimum entity rating of issuers of debt securities is AA minus. This minimizes credit risk and at the same time enhances liquidity of the Fund. Duration of the overall portfolio cannot be more than one year. This minimizes interest rate or pricing risk. The Fund invests 25% of its assets in less than 90 days T-Bills or saving accounts with banks, which further enhances liquidity profile of the Fund.

Exposure in TFCs was 38.7% at the end of the month with average time to maturity of 3.84 years and Yield to Maturity of 11.1% p.a. The TFC portfolio of the Fund is predominantly floating rate linked to KIBOR. The weighted average time-to-maturity of the Fund is 1.51 years.

As the Fund is invested in floating rate TFCs and other short-term avenues any hike in interest rate is likely to improve the return of the Fund. We will rebalance the allocation of the portfolio proactively based on the capital market outlook.
