Average daily allocation for the last 365 days in short-term Government Securities was 88.94% of the Fund size. While, at the end of the month, government securities comprised 84.33% of the Total Assets (85.04% of Net Assets). Weighted average time to maturity of the Fund is 29 days. Placements with Banks rated AA and above stand at 11.49% at the end of March.

In the two T-Bill auctions of March, MoF cumulatively accepted around Rs. 277 billion in realized value against the target of Rs. 250 billion. The cut-off annualized yields for the last T-Bill auction was noted at around 9.41% and 9.43% for 3-month and 6-month tenors, respectively. No bids were received in the 12-month tenor. The return on the Fund will track the T-Bills yields. Therefore, any increase in interest rates will bode well for the Fund due to its short maturity.
