Fund Manager Commentary

During the month under review, the Fund posted an annualized return of 8.9% as compared to the Benchmark return of 6.9%. Outperformance of the Fund during the month is due to profit payment of non performing Household Goods sector sukuk. During CY14, the Fund has posted 15.5% annualized return versus 6.7% by the Benchmark, hence an outperformance of 8.8% p.a. This outperformance is net of management fee and all other expenses.

The allocation in corporate Sukuks with current weightage at around 7.3% is diversified among Cement, Electricity, and Fertilizer sub sectors. Around 90.1% allocation in bank deposits provides diversification and liquidity to the portfolio. Going forward, we will rebalance the allocation of the portfolio based on the capital market outlook.

The weighted average Yield-to-Maturity (YTM) of the Sukuk portfolio is around 13.6% p.a. and weighted average time to maturity is 1.8 years. The weighted average time to maturity of the Fund is 0.13 years. Hence, for investors with medium term investment horizon, the Fund offers an attractive opportunity to earn decent returns. However, since Sukuks prices may go up or down, therefore, only investors with medium-term investment horizon are advised to invest in this Fund.
