Fund Manager Commentary

The Fund posted an annualized return of 13.9% during March 2014 versus the benchmark return of 10.1%. Superior performance of the Fund during the month is due to mark to market gain in PIBs and TFCs. During the last one year the Fund has earned an annualized return of 9.6% as compared to benchmark annualized return of 9.7%.

As the allocation of the Fund shows, exposure in TFCs and Sukuks stand at 44.4%. The weighted average price of the TFC portfolio (excluding TFCs which are fully provided) is around Rs. 94 against the par value of Rs.100. All TFCs in the Fund are floating rate instruments linked to KIBOR.

The weighted average Yield-to-Maturity of the Fund is around 16.9% p.a. while its weighted average time to maturity is 2.04 years. This yield does not include potential recovery in fully provided TFCs (Face Value of Rs. 251 million), which is potential upside for the Fund. Thus, the Fund is expected to perform well over the medium to long term horizon. However, since TFCs prices may go up or down, therefore, only investors with medium-term investment horizon are advised to invest in this Fund.
