## Investment Objective

To earn a competitive rate of return while preserving capital to the extent possible by investing in liquid assets.

## Fund Manager Commentary

The Fund posted an annualized return of 8.6% during September 2015 versus the Benchmark return of 6.8%. Thus registering an outperformance of 1.8% p.a. The annualized return during CY 15 is 11.0% against the Benchmark return of 7.6%, hence an outperformance of 3.4% p.a. This outperformance is net of management fee and all other expenses.

As the allocation of the Fund shows, exposure in TFCs and Sukuks stands at 19.9%. All TFCs in the Fund are floating rate instruments linked to KIBOR.

The weighted average Yield-to-Maturity of the Fund is around 8.1% p.a. while its weighted average time to maturity is 0.6 years. This yield does not include potential recovery in fully provided TFCs (Face Value of around Rs.310 million), which is potential upside for the Fund. Thus, the Fund is expected to perform well over the medium to long term horizon. However, since TFCs prices may go up or down, therefore, only investors with medium term investment horizon are advised to invest in this Fund.

The highlight of the month was 50 basis points reduction in the Discount Rate by State Bank of Pakistan from 7.0% to 6.5% in its Monetary Policy announcement on September 12, 2015; consequently SBP target (policy) rate is set at 50 basis points below the discount rate at 6.0%. Subsequent to reduction in policy rate yields in the market adjusted accordingly. We will rebalance the allocation of the fund proactively based on the capital market outlook.
