Fund Manager Commentary
The Fund posted an annualized return of 8.9% in January 2017 as compared to the Benchmark return of 6.1%. Outperformance during the month was on account of reversal of Workers' Welfare Fund's (WWF) provisioning. During FYTD the Fund has outperformed its Benchmark by 0.9% by earning an annualized return of 7.0%. This outperformance is net of management fee and all other expenses.
The weighted average Yield to Maturity of the Fund is around 7.7% p.a. and that of the TFC portfolio is 6.7% p.a. The weighted average time to maturity of the Fund is around 0.3 year. The Fund's sector allocation is fairly diversified with exposure to Electricity, Banking and Financial Services sectors. TFC portfolio of the Fund is predominantly floating rate linked to KIBOR. However, since TFCs prices may go up or down, therefore, only investors with medium-term investment horizon are advised to invest in this Fund.
We will rebalance the allocation of the fund proactively based on the capital market outlook.
