Investment Objective

To minimize risk, preserve capital and generate a reasonable return along with a high degree of liquidity from a portfolio primarily constituted of bank deposits and money market instruments.

Fund Manager Commentary

The Fund earned an annualized return of 11.59% during the month, thus outperforming the benchmark by 3.24%. Since inception the out-performance of the Fund against its benchmark is 2.06%. The Fund intends to provide its investors consistently better returns than bank deposits.

The Fund has also invested around 4.7% in the newly launched stock market leverage product, namely Margin Trading System (MTS). The risk management guidelines of MTS are more stringent as compared to previous leverage products. Our internal guidelines permit financing in only fundamentally strong companies with lower volatility. It is pertinent to mention that the Fund will provide financing at predetermined rate of return with no direct exposure to stock market. Going forward, with increase in volume of MTS, the investment amount in this asset class will be increased which will further improve the performance of the Fund.

NSPF is one of the highest rated income funds in the market. It cannot invest in any avenue which has more than six months maturity, nor can it invest in the TFCs/ Sukuks and Equities. Moreover, it cannot invest in money market instruments below a credit rating of 'AA-'. The investment value of the Fund has not declined on any day since its launch in November 2009. This Fund is also the underlying Fund for NAFA Savings Plans.

The average maturity of your Fund is around 23 days.

Asset Allocation (% of NAV) 31-Mar-11 28-Feb-11
