Asset Manager Rating:	AM2 by PACRA (Very High Investment Management Standards)

Investment Objective

To generate income by investing in Debt & Money Market securities and to generate capital appreciation by investing in equity and equity related securities.

Fund Manager's Commentary

During the month under review, NAFA Asset Allocation Fund's (NAAF) unit price (NAV) increased by 1.6% while the benchmark increased by 2.1%. Thus your Fund underperformed the benchmark by 0.5%. Since inception on August 21, 2010 the Fund has posted 88.0% return, versus 50.7% by the benchmark. Thus, to date the cumulative outperformance of your Fund stands at 37.3%. This outperformance is net of management fee and all other expenses.

The stock market closed at an all time high level of 24,302, breaking the psychological barrier of 24,000, which it had resisted thrice during this fiscal year. Continuation of foreign interest and less than expected hike in discount rate also contributed to the continued market bull run. NAAF started off the month with an allocation of around 13% in equities, which was increased to around 21% towards the end of the month. The Fund underperformed the benchmark as it was underweight in equities. During the month, allocation was increased in all the sectors barring Oil and Gas, Construction and Materials, and Personal Goods sectors, where the allocation was reduced.

Asset Allocation (% of Total Assets) 29-Nov-13 31-Oct-13
