## Investment Objective

To provide income enhancement and preservation of capital by investing in prime quality Financial Sector TFCs/Sukuks, Bank deposits and short-term money market instruments.

## Fund Manager Commentary

The Fund generated an annualized return of 4.8% for the month of December 2016 versus the Benchmark return of 6.1%. Since its launch in October 2011, the Fund offered an annualized return of 8.9% against the Benchmark return of 8.2%, hence an outperformance of 0.7% p.a. This outperformance is net of management fee and all other expenses.

The Fund is unique as it invests a minimum 70% of its assets in Financial Sector (mainly banks) debt securities, instruments or deposits. Minimum entity rating of issuers of debt securities is "AA-". This minimizes credit risk and at the same time enhances liquidity of the Fund. Duration of the overall portfolio cannot be more than one year. This minimizes interest rate or pricing risk. The Fund invests 25% of its net assets in less than 90 days T-Bills or saving accounts with banks, which further enhances liquidity profile of the Fund.

Exposure in TFCs was 48.4% of net assets at the end of the month with average time to maturity of 3.24 years. The TFC portfolio of the Fund is predominantly floating rate linked to KIBOR. The weighted average time-to-maturity of the Fund is 1.6 years.

We will rebalance the allocation of the portfolio proactively based on the capital market outlook.
