Investment Objective

To minimize risk, preserve capital and generate a reasonable return along with a high degree of liquidity from a portfolio primarily constituted of bank deposits and money market instruments.

Fund Manager Commentary

The Fund earned an annualized return of 9.37% during the month outperforming the benchmark return by 0.97%. The Fund intends to provide its investors consistently better return than bank deposits while offering similar features as those of bank savings accounts. In order to capitalize on the attractive T-bill yields, NSPF has increased its allocation in short-term T-Bills to 48.06%.

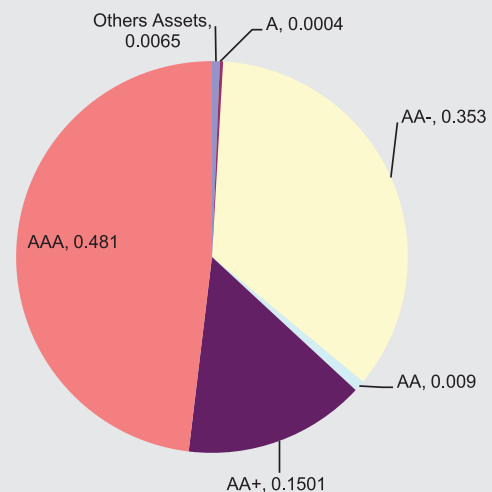

We expect the return on your Fund to further improve going forward on the back of attractive money market placements and higher T-Bills rates. NSPF is one of the highest rated income funds in the market. It cannot invest in any avenue which has more than six months to maturity, it cannot invest in TFCs / Sukuks, and it can not invest in money market instruments below a credit rating of 'AA'. The investment value of the Fund has not declined on any day since its launch in November 2009.

The average maturity of your Fund is around 50 days.
